DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species 5-Fig.5 which includes claims 16, 17, 22, 23, 26, 29-31 in the reply filed on 5/22/08 is acknowledged.
2. Claims 18-21,24,25,27 and 28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species of invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/22/08.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 16, 17, 30 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Fan (2003/0142487). Fan discloses in paragraph 0004 a diffuser plate with elongated lamps underneath. Fan further shows in Fig.3 the curved and folded portion (332) of the lamp outside the display area (32) and discloses in paragraph 0019 that having the dense luminance portion (332) sheltered by the lamp frame are in the scope of his invention.

6. Claims 16,17,22,23, and 29-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Wakabayashi et al. (7314288). Wakabayashi et al. shows a display device in Fig.11 where the folded portions (55) are covered by the lamp frame (51) and outside the display area. In Fig.13, the bent portion of lamp at (91) has a masking portion in which the light generated is reduced or shielded. Re claims 22 and 23, Fig.13 shows a

reflective sheet member (81) with a light reducing treatment (92) at the curved portion of the lamp.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the

contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

10. Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wakabayashi et al. (7314288) as applied to claim 22 above, and further in view of Kimura et al. (7204635). Wakabayashi et al. shows the invention substantially as claimed except for the light reducing treatment including a printed member. Kimura et al. discloses in col.3, lines 15-25 that it is known in the display art to print ink dots to adjust the brightness of the reflective member. It would have been obvious to one of ordinary skill in the art at the time of the invention to print ink dots on the reflective member (81) of Wakabayashi et al. as taught by Kimura et al. for the purpose of adjusting the brightness of the light reflecting off of the reflective member.
